

CALL FOR PAPERS

SIXTH INTERNATIONAL SYMPOSIUM ON

SILANES AND OTHER COUPLING AGENTS

To be held June 13-15, 2007; University of Cincinnati
Cincinnati, Ohio, USA

This symposium continues the tradition set by the first symposium in this series: "Silanes and Other Coupling Agents" which was hosted in 1991 by the Dow Corning Corporation in honor of Dr. Edwin P. Plueddemann. As with its predecessors, this symposium will be concerned with the technological areas where the use of surface primers such as silanes is critical to the success of many technologies. It is also our distinct privilege to be able to hold this the sixth symposium in the series in collaboration with Prof. Wim van Ooij and his group at the University of Cincinnati. Prof. van Ooij was a participant at the 1991 symposium in honor of Dr. Plueddemann and has been an active researcher in the field of silanes ever since. Prof. van Ooij and his group look forward to hosting this symposium and greeting all participants from both

academia and industry from all corners of the globe. Historically the silanes have been used as coupling agents for thin films in the microelectronics industry and in glass fiber composites where the use of silanes has been an enabling factor in the success of many manufactured products. Quite surprisingly, silanes have also found a role in biotechnology as specific coupling agents for bonding polynucleotides to the so-called "gene chips" and also in cosmetic applications. This symposium is organized to bring together scientists, technologists and engineers interested in all aspects of coupling agent technology, to review and assess the current state of knowledge, to provide a forum for exchange and cross-fertilization of ideas and to define problem areas which need intensified efforts. The invited speakers have been selected so as to represent widely differing disciplines and interests, and they hail from academic, governmental and industrial research laboratories. This meeting is planned to be a truly international event both geographically and scientifically.

AMONG TOPICS TO BE COVERED ARE:

- ▶ Mechanisms of silanes action.
- ▶ Role of silanes in adhesion of coatings, composites and adhesive joints.
- ▶ Deposition techniques:
 - solution
 - plasma
 - vapor
 - electrochemical
- ▶ Non-silane adhesion promoters.
- ▶ Plasma polymerized coatings as adhesion promoters.
- ▶ Relevance of silanes in durability of bonds.
- ▶ Applications:
 - coatings, corrosion inhibitors
 - adhesive joints, composites
 - biological applications, cosmetics
- ▶ Silane surface characterization.
 - Standard: contact angle, FTIR,...
 - Advanced: neutron scattering, ...

This symposium is being organized by MST Conferences, LLC under the direction of Dr. K. L. Mittal, Editor, Journal of Adhesion Science and Technology (JAST) and in collaboration with Prof. Wim van Ooij of the University of Cincinnati. A proceedings volume is planned for this symposium and further details will be provided in due course. (manuscripts to be handled by Dr. Mittal) Please notify the conference chairman of your intentions to present a paper as early as possible. An abstract of about 200 words should be sent by **January 30, 2007** to the conference chairman by any of the following methods:

E-mail: rhl@mstconf.com
 FAX: 212-656-1016
 Regular mail:

Dr. Robert H. Lacombe
 Conference Chairman
 3 Hammer Drive
 Hopewell Junction, NY 12533

Contact by phone: 845-897-1654; 845-227-7026
 Full conference details and registration via the Internet will be maintained on our web site:

<http://mstconf.com/silanes6.htm>

Or mail response form below to the conference chairman at the address above.

SIXTH INTERNATIONAL SYMPOSIUM ON SILANES AND OTHER COUPLING AGENTS

I PLAN TO:

- ATTEND
- PRESENT A PAPER
